Technical Skills

Programming Languages: Go, Typescript, Javascript, C++, Java, C, Python, PowerShell, Godot, SQL
Software: IPFS, Kubo, LibP2P, Miracl, VS Code, Git, Github, Office365 Administration, Active Directory, Besu, Fabric, Docker, Ethereum, Godot Engine

Work Experience

Research Assistant on Distributed Ledgers and Security May 2023 - April 2024
Nippon Telegraph and Telephone Corporation Tokyo, Japan

- Researched and analyzed modern security technologies related to InterPlanetary File System, or IPFS, including Kubo, LibP2P, IPNS, and the Miracl library
- Created an implementation of the proposed protocol in Go utilizing IPFS to facilitate cross-blockchain communication and creation of decentralized timestamps that allow for permissionless verification of user-states with low fees
- Co-wrote and edited a research paper detailing the aforementioned implementation, which was submitted to the DSN 2024 conference

IT Support Technician Sep 2022 - Apr 2023
College of Physicians and Surgeons of British Columbia Vancouver, BC

- Oversaw and resolved support tickets as a Tier 1 and 2 support technician using a ticketing system designed with ITIL framework
- Maintained and troubleshooted approximately 200 devices and software, including but not limited to Office 365, SharePoint, Active Directory, and ManageEngine
- Managed and updated statuses of all users and assets encompassing over 150 employees and over 500 IT and non-IT assets

Projects

Database Project Mar 2025 – Apr 2025

- Designed and implemented a BCNF-compliant relational database using PostgreSQL/MySQL and created SQL DDL for schema setup and population
- Developed secure RESTful APIs for CRUD operations using Node.js, with user authentication and authorization
- Contributed to modular code structure, unit testing, and frontend-backend debugging across a 3-week sprint-based timeline

UBC Insights Sep 2024 - Dec 2024

- Developed a Typescript application to portray information about historical data about UBC courses, as well as functions to query for specific parameters related to courses, such as professor, GPA, course topic, etc
- Implemented functionality to read from specifically formatted ZIP files to import datasets to be queried, as well as verification for properly formatted files
- Designed a server-based front-end for display of queried data into graph-form, allowing easy interpretation of requested information

Japanana Tour Jun 2024

- Collaborated with other fans to participate in a game jam hosted by a content creator
- Learnt Godot from scratch to plan, implement and launch a 2D endless runner side scroller game
- Worked with an artist and composer to add assets into the game for visual and audio effects

Education

Bachelor of Science, Computer Science Major Sep 2020 – April 2027
University of British Columbia Vancouver, BC
